1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. The disclosure is objected to because of the following informalities: on page 6, line 3 before " for " - - - and now U.S. patent no. 6,712,084, - - - should be inserted.

Appropriate correction is required.

3. Claims 2 and 12 are objected to because of the following informalities: in line 2 of claims 2 and 12 " a " should be - - - an - - -. Appropriate correction is required.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 3, 5-6, 10, 13, 15-16 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3, 5-6, 10, 13, 15-16 and 19 contain the trademark/trade names "DeviceNet", "GBROR", "Tru-Flo" and "BlueBox". Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the

claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe particular types of networks, flow verifiers or communication managers and, accordingly, the identification/description is indefinite.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show testing or calibration of flow devices or monitors. However neither they nor any other prior art of record showed or would have made obvious a system or a method for in-situ verification and calibration of flow control devices structured and operated as in claims 1 or 11 where a controller of the flow verification device is programmed to verify and, if necessary, calibrate the flow control devices over a first network physical layer based upon a single command provided through a second network physical layer with the network physical layers connected as claimed.

7. Claims 1, 4, 7-9, 11, 14, 17-18 and 20 have been allowed.

8. Claims 2 and 12 would be allowable if amended as suggested in paragraph 3 above.

Art Unit: 2856

9. Claims 3, 5-6, 10, 13, 15-16 and 19 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tom Noland whose telephone number is (571) 272-2202. The examiner can normally be reached on weekdays from 9:00 to 5:30.
